

This page contains some website addresses for FIRST SEMESTER Earth Science.  
If the hyperlink does not connect you to the site, copy the address to your web browser.

These sites contain information and resources from a Biblical world view.

<http://www.answersingenesis.org/kids>

<http://www.icr.org/resources-for-students/>

Chapter 2: This site contains a star chart for observing the Celestial Sphere.  
A download is required as well as registration. The star chart is used in class but the other content of the website is not endorsed.

<http://www.skyandtelescope.com/observing/skychart/>

Chapter 3- 6: This site contains pictures and information about the sun, planets, moon, and other objects in the solar system. The authors of this site inject their non-Biblical world view even though it is paid for by tax dollars. The objective information would be helpful for planet reports.

<http://solarsystem.nasa.gov/planets/>

Chapters 2-7: This site contains pictures and information about the Hubble Space Telescope.  
The authors of this site inject their non-Biblical world view even though it is paid for by tax dollars.

<http://hubblesite.org/>

Chapters 4 & 7 These sites contain information about missions from earth to explore the celestial sphere. Non-Biblical world views can be seen through the purposes of and conclusions from some of the missions.
